- Procurement
- Task Estimation
- Project Planning

Portfolio status: Ready

What would you do differently if you started this over? I would focus on my Capstone that is related to business management. Something more involved with numbers and data analytics that can be more product management oriented.

What other work does this make you want to do? I want these skills to be transferred to Product Management. I'm excited to use these skills to apply for that role. I have gained soft skills such as strong communication, negotiation, and leadership skills. Working on these can enhance my profile.
