Your Name: Brian Camilo

Portfolio Item Name: Survey Form Web Development
Created for: Personal
What part did you do? Everything
What skills does it demonstrate? HTML, CSS, Creativity,
Portfolio status: Finish
What would you do differently if you started this over? I think this work can be highly modified. This is the most basic survey I have made and I believe I can add more into it. Other than that, I guess I want to change the content of my survey to be more product or business related.
What other work does this make you want to do? Understanding of web development and user experience are both valuable in product management. I would like to understand more about UX Design, Data analysis and feedback interpretation, web and mobile product development, digital marketing fundamentals, and portfolio development.
